

# STOP THE APARTHEID WALL!!

Israel is building a wall through the occupied West Bank, isolating millions of Palestinians in walled prisons

## Stats and facts about the wall:

- Israel's Apartheid Wall is 4 times longer and twice as high as the Berlin Wall, with razor wire, armed sniper towers, trenches, cameras, and military patrols.
- The first section of the Wall will confine 1.5 million Palestinian men, women, and children into an area that's less than half the size of Delaware.
- More than 200,000 Palestinians will be faced with expulsion.
- The Wall has reduced the amount of water available to Palestinians by 1,024,987,560 gallons per year
- Israeli soldiers have uprooted over 102,320 olive trees to build the wall. Olive trees can take 100 years to mature, and are vital to the Palestinian economy and way of life.
- 40,000 acres of land have already been confiscated, hundreds of homes have been demolished, and many farms have been seized to build the wall.
